

Enclosure solutions

Are your customers and staff irritated by the loud noise a generator makes? We can soundproof your generator to the level of 58 decibels or less to give you a peaceful alternative that keeps the sound at an acceptable level.

Power cuts need not mean work at your business or home comes to a standstill. Silver Solutions has been designing energy efficient solutions for eight years to suit everyone's needs. Using advanced soundproofing and cooling technology, we build custom housing to silence any generator. Call us for a quotation today

We specialise in: generators, installation, automatic switch-over for uninterrupted power supply, and general maintenance ECB N:GS02276
